Document Body

Carmen;

I received your earlier message regarding the automated soxhlet extraction method 3541 and your inquiry about the method with EPA's internal QC/Lab group. There is no need to rush getting a response. In order to maintain consistency with respect to extraction procedures for all the samples proposed for PCBs analysis using EPA Method 8082 in the Sampling and Analysis Plan, the soil and concrete samples will be sent to our local lab, American Analytics, for extraction (soxhlet extraction) and analysis rather the lab in North Carolina (SGS Environmental). The subset of samples proposed for conger testing using EPA Method 1668B

will be conducted by SGS Environmental. I also left you a similar message at your office voice mail. Please call me if you have any questions.

Regards,

Linda Conlan, PG | Senior II Geologist
